

THE COLUMBIA EVENING MISSOURIAN

THIRTEENTH YEAR

COLUMBIA, MISSOURI, WEDNESDAY, JUNE 22, 1921

LAST EDITION

NUMBER 250

3 EXAMINED BY STATE IN LIQUOR TRIAL

Negro Testifies That Bruce Pollard Was Paid \$200 for Ten Gallons of Whisky.

TRIAL IS UNFINISHED

Three Are Believed to Have Met Man in Buggy East of Town and Obtained Liquor.

Three witnesses for the state were on the stand this morning in the trial of Bruce Pollard, who is charged with wholesaling and transporting liquor.

Charley Williams, a negro, was the first witness for the state and testified that on the night of February 12, 1921, he and Ed Williams, another negro, and Bruce Pollard drove east of town near the University hog serum plant. Williams said that the three met a man in a buggy and that three kegs of whisky were taken from the buggy and put in the car. Pollard stayed with the man in the buggy, he said. The next day Williams said that he paid Pollard \$200 for ten gallons of the whisky which had been procured the night before.

Jessie Rude, who is supposed to have arranged for the sale of the liquor to Charley Williams, testified that he told Williams where he could buy some whisky. Williams declared that the ten gallons of whisky were bought for his own personal consumption. He has, however, been arrested here before and fined for selling liquor.

Ed Williams, the third witness for the state, testified that he was with Charley Williams and a white man the night the liquor was obtained, but said he did not know whether or not the man was Pollard.

Bruce Pollard has been employed for some time in Columbia by the Simous Construction Company.

The state continued its case this afternoon by calling John Scott, a negro. Scott said he had bought ten gallons of whisky from Pollard and had paid him \$200 for it. He kept it in his home in two 5-gallon kegs for a few days, he said, and then poured it out. He did this for fear of getting into trouble, he said.

Sheriff Fred Brown testified that he searched the premises of Scott in February after the arrest of Pollard and found two pipes which were parts of whisky stills, in an out-house on the place. He said that Scott at first denied knowing anything about the apparatus, but had at last admitted that he found them in a house on Second and Third streets. The sheriff said he had obtained a sample of white whisky from Scott and had turned some of it over to the prosecuting attorney.

C. G. Drumm, of the School of Medicine of the University, was called to testify as to the results of the test he had made on this whisky. Drumm said that the liquor contained at least 30 per cent alcohol. This concluded the case for the state.

The defense then called several Columbians to testify as to the reputation of the three witnesses who had testified against Pollard. All agreed that their reputations were bad.

The defense then called seven or eight witnesses to testify to the good reputation of the defendant.

POLO TITLE TO AMERICA TODAY

International Cup Won When 2d Game of Tournament Goes to U. S., 10-6.

HURLINGHAM, Eng., June 22.—America won back the international polo cup by winning the second game of the tournament here this afternoon 10 to 6.

By winning the first game 11 to 4, the cup was wrested from the holders when the second battle ended today. The cup was taken from America in 1914.

EXCURSION TO ST. LOUIS

Wabash Will Run Special Trains Saturday and Sunday.

The Wabash Railroad has declared excursion rates to St. Louis from Columbia, and all points on the road, for next Saturday and Sunday. The round trip fare from here, not including the war tax, is \$3.

Tickets will be good on all regular trains leaving Columbia Saturday and up to and including Sunday morning. Return tickets are good Sunday, the last train leaving the Union Station at 10:30 o'clock.

The Columbia branch will make an extra trip Sunday from Centerville, leaving there at 10:45 p. m., and will enable passengers returning to Columbia, Brown Station and Hallsville to leave St. Louis as late as 7 o'clock.

Sheriff Going After Smith.

Sheriff Fred Brown will leave tonight for Kansas City to bring back Virgil Smith, who is being held there by the police. He is wanted here on a charge of taking an automobile belonging to Ralph Craft.

THE WEATHER

For Columbia and vicinity: Local thundershowers this afternoon or tonight; not so warm tonight. Thursday partly cloudy weather.

For Missouri: Unsettled but mostly fair tonight and Thursday; continued warm.

Overcast skies prevail this morning in the lower Missouri Valley and lower Plains, and scattered showers have occurred, the heaviest, 1.22 inches, falling at Dodge City, Kansas. A storm of considerable development is central off the mouth of the Rio Grande; it is giving gales and rain as far north as Galveston.

Temperature changes over the country have generally been slight.

The crest of the present rise in the Missouri is passing McBaine. Bankful stages will not be reached, except in low places.

Missouri highways continue in fair to good condition.

Local data: The highest temperature in Columbia yesterday was 89, and the lowest last night was 70. Precipitation 0.00. A year ago yesterday the highest temperature was 75 and the lowest was 54. Precipitation 0.41. Sun rose today 4:43 a. m. Sun sets 7:38 p. m. Moon rises 9:07 p. m.

TO RESTRICT LUMBER MEN

Attorney General Says They Hold Prices Up Artificially.

JEFFERSON CITY, June 22.—Attorney General Barrett announced today that he would file proceedings in the Supreme Court at once against the Lumber Men's Association, The Lumber Trade Exchange, and the Material Dealers' Association, all of St. Louis, to restrict them from practices which he believed are artificially holding up the building material prices.

Barrett made this announcement at the resumption of the building probe before Commissioner Schackelford.

URGES MORE HEALTH STUDY

Doctors Close Conference; Discuss Hypertension.

The closing session of the second annual Missouri Health Officers' Conference was held yesterday afternoon in the physiology laboratory of the Medical Building. Part of the afternoon's program was scheduled to be held in the General Library but was carried to the Medical Building following a luncheon at the Daniel Boone Tavern for the officers and guests.

Dr. A. W. McAlister, formerly state commissioner of health, talked on "How When and Where Should Public Health Be Taught?" His lecture was to have been given at the meeting Monday afternoon but he was unable to be on the program until yesterday. Doctor McAlister urged the county health officers to promote the adoption of a health program in co-operation with authorities of elementary and secondary schools throughout the state for the instruction of the children in sanitation and the means of better health. He said the information should be administered in an interesting and simple manner so the students could grasp it. Following Doctor McAlister, the following talks were given:

Shocks.—Dr. D. H. Dolley, professor of pathology; Rural Sanitation.—Dr. Thomas Parran, Jr., state director of rural sanitation; The Present Status of the Public Health Laboratory.—Dr. M. P. Rateneel, professor of preventive medicine and director of the public health laboratory; and The Sanitary Engineer.—Dean E. J. McCausland of the School of Engineering.

Dr. C. W. Green, professor of physiology, and Dr. Dan G. Stine, professor of clinical medicine talked on the disease of hypertension. Following these, two demonstrations of the maturation test, which is of a respiratory nature, were made upon students. The object of such tests is to determine the amount of oxygen consumed by a person after the denial of food for several hours, thereby ascertaining a person's susceptibility to hypertension and accompanying diseases. The demonstrations were under the direction of Dr. C. W. Green. Doctor Stine talked on the symptoms and effects of the disease. He said that hypertension is characterized by nervousness, speedy heart, short breaths, feeling of faintness and excessive perspiration. A number of women students have come to the hospital with these indications sometimes, after only one semester's work. Several of these, he said, complained of inability to concentrate and a nervous irritation at times produced by the presence of people and often friends.

The next annual meeting will be held in Columbia about this time next year.

Knox Farmers Not Coming.

The Knox County farmers who had intended to come to Columbia tomorrow and to visit the College of Agriculture will defer their trip on account of the rain and because of the fact that they are now in the middle of their harvesting, which came on sooner than they had expected.

MISSOURI CORN GROWING WELL; WHEAT IS RIPE

Rust, Hessian Fly and Chinch Bug Bothering Wheat in This and Surrounding States.

APPLES GOOD IN WEST

Berry Crop Promising—Meadows Good but Need Rain—Potato Bugs Troublesome.

Missouri corn made rapid growth last week and received fine cultivation. Most corn is clear. The planting of the corn is practically completed and cultivation is becoming general. Considerable improvement in condition is shown, and more rapid growth is being made following the rise in temperature, according to the weekly crop report issued by E. A. Logan, agricultural statistician for Missouri, and Jewell Mayes, secretary of the State Board of Agriculture. Good stands are generally reported throughout the northern and central states. Recent rains have greatly benefited the crop in Kansas.

Missouri wheat harvest is in full swing, with no shortage of labor, and will be completed by the end of this week. The condition of winter wheat continues to be quite variable, ranging from fair to good. Harvesting has commenced in the south and southwest and fields are commencing to turn yellow in the central states. Rust, Hessian fly and chinch bugs are reported in Illinois and Missouri, and some rust and fly in Indiana. Rust and fly appear to be the chief deteriorating factors for the country in general. The condition of the spring wheat crop is generally satisfactory.

The condition of the oat crop in the central states is improving but some thin spots and poor stands are reported. Recent rains benefited the crop in Nebraska, Kansas, and Missouri. Harvesting of early sown oats in Missouri is under way even north of the Missouri river.

Missouri cotton is improving with the coming of warmer weather but still shows the effects of the unfavorable spring. Weeds are becoming numerous.

The planting of Irish potatoes is nearing completion in the northern tier of states and the bulk of the crop is up to a good stand and commencing growth under favorable conditions. Some complaint of bugs is reported from portions of Illinois, Wisconsin and Iowa, and rain is needed in Missouri. The planting of sweet potatoes continues and the crop is reported to be making a favorable growth.

The apple crop prospects in Colorado, Montana and the states farther west are quite good as well as the crop of most other fruits. About half a crop of fruit is still expected in New York and the Maine crop is very promising. Peaches are improving in condition in Georgia. The prospects for the berry crop of various kinds are generally promising throughout the country. Citrus trees are showing heavy bloom in Florida. Meadows and pastures are generally good although rain is needed in the eastern section of the country.

HYDE'S MESSAGE DEBATED

Republicans Showed Loyalty by Defeating Whitaker Amendment.

JEFFERSON CITY, June 22.—Rumors persisting here for two weeks that Governor Hyde has lost his influence over the Republican majority in the House were effectively quieted when the House, by a vote of 69 to 12, turned down the amendment of Representative Whitaker, of Hickory County, providing that the governor be required to send his message to the House for approval.

Whitaker, an opponent of the County Unit Bill, contended that the governor's message contained statements reflecting on the opponents of the measure. Governor Hyde's special message read in the legislature lists twenty-two new subjects which the special session may legally consider.

REGISTRATION EASY TODAY

But Enrollment May Finally Equal That of Spring Term.

No definite figures on the enrollment for the summer term at the University were available early this afternoon. More than seventy-five students were in front of the University Library when the doors of the building were opened shortly before 9 o'clock. These students experienced little trouble in getting their courses arranged as the number of students registering was smaller than on the first registration day of the spring term. Counting the students who were here for the spring term, it is probable that the total registration will equal that of the preceding term, however.

Would Curb Rent Profiteers.

JEFFERSON CITY, June 22.—The first measure designed to curb the activities of Missouri rent profiteers was introduced in the House today by a representative from St. Louis. The bill provides for a rent commission in every county and in every city of 100,000 or more, which would have power to regulate house rent and fix fair rentals.

FIRST CHURCH BUILT IN BOONE COUNTY 104 YEARS AGO, JUNE 28

Five miles north by east of Rocheport, in the lower part of Perche township, is the spot where 104 years ago on June 28, five persons organized the first church within the present limits of Boone County. The church was named Bethel Baptist, and it served for many years as a place of worship for Boone County Baptists. The first building was constructed of logs and stood until just before the Civil War when it was removed and succeeded by the Walnut Grove Church.

Four years ago on the occasion of the centennial celebration of the church, special exercises were held and Judge John Phillips of Kansas City, a former attendant upon the services of Old Bethel, spoke. He recalled many of the first settlers and gave accurate descriptions of the old church. Judge Phillips said that the church door was strong enough to resist a battering ram, and that the pulpit was hewed in and afforded the minister shelter in addition to being a veritable sweat-box. The benches were built on a rising scale and one had to climb onto the rear benches.

The first cemetery in Boone County was the old Bethel burying ground, located near the church, in the southern quarter of Perche township. The first burying therein was that of a man named Payson, who was interred in 1818. The cemetery is now unused.

Members of the congregation worshipped in harmony until 1835 when dissent arose regarding the matter of foreign missions. The anti-missionary Baptists withdrew, and the remainder, numbering about forty persons, organized the Walnut Grove Baptist Church.

R. O. T. C. MEN OFF TO CAMPS

Only Regular Army Men Left Here for Summer Drilling.

The last detachment of University students left today for Fort Snelling and Camp Knox. The completed Missouri quota at these camps is now 100 infantrymen at Fort Snelling, and 40 students at Camp Knox for field artillery work.

R. O. T. C. activities during the summer months will be limited to the regular army men stationed here, according to Capt. James P. Kelly, the only officer left with the University unit during the summer term. No R. O. T. C. courses for students are offered this term.

Drilling the detachment of thirty-five regular army men, receiving new equipment, and keeping the field artillery horses in condition will constitute the summer work of the R. O. T. C. headquarters. Preparations will go on for the beginning of the military courses in the fall.

Four members of the R. O. T. C. left this morning for Camp Knox. They were J. R. Wollman, Russell Grove, H. A. Mangan and Donald Russell.

GULF STORMY AT GALVESTON

The W. H. Boheny, Oil Tanker, in Distress—Propeller Is Lost.

HOUSTON, Texas, June 22.—Spray is breaking over the sea wall at Galveston from a part of the storm which was sweeping the Texas coast early today.

At least one ship, the W. H. Boheny, a Mexican Petroleum company oil tanker, is in distress in the storm off Galveston. Her captain sent a message for help, saying that the great vessel had lost her propeller.

Radios from other ships in the gulf reported raging seas. Weather observers here and at Galveston did not expect a further rise in the tide at Galveston and declared that the sea wall could protect the city.

MAY - CREATE NEW OFFICE

Executive Secretary Would Assist President of U. S.

WASHINGTON, June 22.—Resolutions creating a new office in the national government, who would virtually be an "assistant to the President of the United States" are under serious consideration by the joint committee on re-organization late today.

This office probably would be called an "executive secretary," and he would make thousands of decisions of lesser importance, which now burden the President, leaving the chief executive free to devote himself to the bigger affairs of the government.

The President would still have his private secretary, who would, as at present, make engagements for the President, meet all visitors, and be at his right hand at all times.

CLUB TO BE REORGANIZED

Circuit Court Grants Petition for New Corporation.

The Circuit Court has granted a petition for the dissolution of the corporation formed by the Columbia Country Club.

The club will re-organize under a new plan which will not make it necessary for its members to assume tax burdens that would be assessed by the government under the old plan.

KING GEORGE GIVES ULSTER HOME RULE

Makes Strong Appeal for Peace at First Irish Parliament Meeting at Belfast.

RECEIVES GREAT OVATION

Orangemen Welcome Monarch and Queen Who Make Trip to Ireland on the Royal Yacht.

BELFAST, Ireland, June 22.—King George today formally invested Ulster with Home Rule.

Advancing from a temporary throne in the city hall the king read his speech calling the first Irish parliament into session. The king and the queen were given a rousing reception by the enthusiastic Orangemen. They crossed to Ireland on the royal yacht Victoria and Albert.

He made an appeal of "peace for Ireland" in his speech.

"The English speaking world is anxious for a settlement in Ireland," he said. "I pray that my coming to Ireland will be the first step towards peace. I appeal to all Irishmen to forget and forgive."

The king and the queen, following the formal opening of the Parliament opened their yacht for the return trip to England.

CHINCH-BUGS AGAIN ACTIVE

Haseman Urges Fight Against Pests Before They Learn to Fly.

The annual migration of chinch-bugs from wheat to corn-fields is beginning, and the next ten days will determine whether or not they will damage the crop to any great extent. Last year Missouri farmers lost close to twenty million dollars because of these small pests. The next ten days will be the only chance to stop them. Each day that they are controlled means a million dollars saved in corn alone. This is the word that Prof. Leonard Haseman is sending out to the farmers of the state from the Horticulture Department.

The bugs are migrating earlier this year than usual. They generally move in the third or fourth stage of development, instead of the second. They do not yet have wings, and can not grow them until they get out of the wheat stubble to fresh food. That is why the department is urging the farmers to take steps to confine them to the wheat fields, where they will soon starve to death.

The method being particularly urged is the so-called "ditch-log-and-barrier." First a deep furrow is plowed between the wheat and corn fields. The bottom of this furrow will quickly become dry and dusty. Then a good-sized log or fence-post should be procured and dragged every ten minutes through the furrow. It is estimated that one horse and a small boy can patrol a field half a mile long in this way, and be efficient. As the bugs cannot fly, they get stuck in the dust at the bottom of the furrow, as often as every ten minutes, from the time when the sun first gets hot in the morning until sundown, practically no bugs will get across. This method, to be effective, must be used consistently if the field is to be saved.

Of course the log will not work during rainy weather or for a short time after showers, but the bugs are not likely to travel much during rain either. However, if it gets hot before the ground becomes dusty, a line of cressets or other odorous coal-tar oil will turn the bugs back.

The log method is being urged because it requires no cash outlay, but if conditions make its use impracticable, the oil should be used anyhow, for the damages done by the bugs to the crop will cost more than the oil. Where oil is used, a line is sprinkled between the fields, and need be only a few inches wide. Several applications should be made the first day, to get a line of soil thoroughly soaked with the oil. After that, one or two applications a day will be enough. It is said by many farmers that this method can be made sure if a ridge is made with hoes. In this case the ridge is sprinkled, often by means of a bucket with a nail-hole in the bottom of it, until the ridge is well saturated with oil, and then kept that way until the bugs are known to have stopped traveling.

Short Course Announcement Printed.

Ten thousand copies of the 1921-22 announcement of the two-year winter course in agriculture have been received at the office of the University publisher.

Distribution of these will not be made, however, until September. The announcement is illustrated with pictures of buildings on the East Campus and group pictures of short-course students.

Ertle Dempsey-Carpentier Referee.

JEFFERSON CITY, June 22.—Harry Ertle, of New Jersey, was named today as referee for the Dempsey-Carpentier fight here July 2. Ertle was named in a resolution adopted by the New Jersey Boxing Commission, under whose supervision the fight is to be held.

5000 ATTENDING CONVENTION

Meeting of Northern Baptists to Continue Until Tuesday.

DES MOINES, Ia., June 22.—More than 5,000 delegates and visitors from various Northern Baptist churches throughout the country were here today for the opening session of the Northern Baptist Convention, which will be in session until June 28. Among the foreign representatives were those from Burma, Assam, India, East China, South China, West China, Africa and Japan, the Philippines and Central America.

Mayor H. H. Barton, of Des Moines, greeted the visitors, and Governor Kendall welcomed them to the state. President Ernest L. Tustin, the president of the Northern Baptist Convention, made response. The chief address was made by the Rev. C. N. Arhuckle, pastor of the First Baptist Church, Newton Centre, Mass., on "Fellowship in Christ." Reports were made by the executive committee and the finance committee.

The afternoon and evening sessions were given over to the golden jubilee anniversary of the Woman's American Baptist Foreign Mission Society.

NO BOYCOTT OF BRITISH GOODS

But American Federation of Labor Urges Recognition of Irish Republic.

DENVER, Colo., June 22.—Efforts of Irish sympathizers to place the American Federation of Labor on record as favoring a boycott of British goods failed today.

The convention adopted a resolution urging Congress to recognize the republic of Ireland and expressing the sympathy of labor with the struggling Irish people.

Radical Irish adherents did not give up the fight to obtain the boycott until every parliamentary trick had been used by those favoring the boycott, but they were outvoted at every turn.

The convention unanimously adopted a resolution calling for an amendment of the Volstead act to permit the sale of "wholesome beer."

NO MORE ENTRIES ACCEPTED

241 Students Throughout State in Seed Production Contest.

Entries closed this month in the annual seed production contest of the vocational agricultural classes of Missouri high schools. The list as announced this week by Secretary C. E. Carter, of the Missouri Crop Growers Association at the Missouri College of Agriculture, is headed by the Palmyra school with 15 students competing for the state prize. Milan and Osceola tie for second place with 12 each. Tins follows closely with 11 while Kirksville and Lebanon each have 10 students growing grain in this state-wide race. The final test will occur next November at Columbia in connection with the newly established Junior Farmers' Week.

There are, all told, 241 students in this competition representing the following schools: Palmyra, Milan, Osceola, Tins, Kirksville, Lebanon, Gainesville, Centralia, Lees Summit, Smithton, Butler, Bethany, Ava, Clinton, Kahoka, Seymour, Auxvasse, Appleton City, New Hampton, Monticello, Mexico, Shelbina, Walnut Grove, La Monte, Green Ridge, Gallatin, Marlinton, Mason, Olean, Unionville, Rolla, Hannibal, Mayville, Chillicothe, Cape Girardeau, Belton, Mount Zion.

Honors will be hotly contested also in the state corn growing contest for men and boys, according to Mr. Carter. In the men's five-acre contest there are 28 entries; and in the boys' five-acre contest 182. The one-acre contest for boys has closed with 149 entries.

The contests open to both men and boys in growing soybeans, wheat and oats have 72 entries.

By this splendid list of entries the schools and grain growers of Missouri have pledged in the most effective way their hearty support of the College of Agriculture in its work of crop improvement.

TO PLEAD SELF DEFENSE

Fisherman's Slayer Says Victim Was Attentive to Wife.

POPLAR BLUFF, June 22.—Harrison Zanaul, confessed murderer of Mack Fairbanks, a fisherman who was found dead at the Zanaul home a few miles south of this city Monday night, will probably plead self defense when his trial comes up in the circuit court here, it was learned today.

Zanaul declared that he had warned Fairbanks to keep away from his wife to prevent a shooting. Zanaul declared Fairbanks had persisted in showing his affections on Mrs. Zanaul; and that he, Zanaul, refused to permit the continuance of the "eternal triangle."

Bank Cashier Shot by Bandits.

EXETER, Ill., June 22.—H. W. Friese, president of the Farmers' State Bank at Schaumburg, seven miles east of here, was shot and seriously wounded today by five automobile bandits who escaped, early this morning.

Miss Maloit's Father Dies.

Friends of Miss Pauline Maloit, instructor in Spanish in the University, have received word of the death of her father at his home in Elkhurst, a suburb of Chicago. Miss Maloit was called home Saturday on account of his illness.

To Regulate Beer Sale.

WASHINGTON, June 22.—Regulations governing the manufacture and sale of beer as a medicine will be issued soon, David Blair, of the Department of the Interior, indicated today.

NO FEE FOR PHYSICAL TEST

Public Health Service Will Examine Training Camp Candidates.

Candidates for the Citizens' Military Training Camps to be established throughout the country this summer will be given free physical examination by any physician connected with the United States Public Health Service. This service has 140 stations. Any young man who desires to attend one of the training camps may secure the necessary physical test by taking his application blank to the nearest Public Health Service station. This arrangement was made in order that candidates might be saved the expense of a physical examination by civilian physicians. Arrangements are being completed whereby candidates may be examined by officers of the Medical Reserve Corps. Examinations are also given at any military camp, post or station.

TO COIN SILVER DOLLARS

\$270,000,000 Will Be Minted in Next Five Years.

Are dollars scarce with you? If so you can now begin to replenish your stock, for the Treasury Department has started to coin 270,000,000 silver dollars. No dollars have been coined since 1914, when the bill permitting coinage went out of effect. During the war, Great Britain bought 279,000,000 silver dollars. There has since been an acute shortage. In 1918 a bill was passed authorizing the coinage of silver dollars but coinage was not begun till last March. Since then about \$20,000,000 have been coined. It is estimated that five years will be taken in completing the work.

TO CO-OPERATE IN BUYING COAL

Farm Bureau Federations Plan Adoption of Measures for Cheap Fuel.

At the call of President J. R. Howard of the American Farm Bureau Federation, a co-operative coal buying conference was held in the general offices on June 13. Secretary J. W. Coverdale presided, and J. B. McLaughlin, secretary of the West Virginia Farm Bureau Federation, presented the plan of his organization, at whose request the conference was called.

A committee consisting of O. T. Stewart of Ohio, F. W. Boyle of Indiana, J. R. Bent of Illinois, J. B. McLaughlin of West Virginia, and James E. Black, an economist for the American Farm Bureau Federation, was appointed to work out a coal buying plan presented to the presidents and secretaries of the mid-west bureaus in Chicago on June 20.

The plan to be proposed by the committee will be based on the following recommendations:

1. That any and all orders for coal be placed so far as possible with operators situated and located on railroads, or routed with the transportation company that will give the consumer or consignee the cheapest freight rate to his delivery point, excepting in cases where the request is made for a special or particular kind of coal or a special routing; and that there be furnished to the various state farm bureau federations, and also to their local organizations, when requested by them, market quotations on the 25th of each month for the succeeding month.

2. That state farm bureau federations use standardized order blanks, and when orders are placed furnish each state farm bureau federation with a duplicate copy of bill of lading and invoice.
3. That an examination be allowed of all records by any authorized representative of the American Farm Bureau Federation upon presentation of proper credentials.
4. That the state farm bureau federations severally agree to give publicity and to encourage their respective co-operative elevators, exchanges, farmers' clubs, and individuals in every way possible to pool their orders for coal with their respective central organizations and furnish the same with all quotations, order blanks from time to time, plan for handling, and any other information that will be helpful in meeting their requirements for coal; and also to endorse and forward promptly to the purchasing agency through which the coal is purchased all orders received by them from their respective local organization or individuals.

Bank Cashier Shot by Bandits.

EXETER, Ill., June 22.—H. W. Friese, president of the Farmers' State Bank at Schaumburg, seven miles east of here, was shot and seriously wounded today by five automobile bandits who escaped, early this morning.

Miss Maloit's Father Dies.

Friends of Miss Pauline Maloit, instructor in Spanish in the University, have received word of the death of her father at his home in Elkhurst, a suburb of Chicago. Miss Maloit was called home Saturday on account of his illness.

To Regulate Beer Sale.

WASHINGTON, June 22.—Regulations governing the manufacture and sale of beer as a medicine will be issued soon, David Blair, of the Department of the Interior, indicated today.

SIMS' RETURN GREETED WITH IRISH MUSIC

Expected Demonstration to Show Disapproval of London Speeches Checked by Police.

HURRIED TO HOTEL

Admiral Disappeared Before Waiting Thousands Knew of His Arrival—Won't Discuss Recall.

NEW YORK, June 22.—Admiral William S. Sims came home today to the tune of "The Wearing of the Green."

As the liner Olympic swung into the pier with the admiral aboard, a little steamer slipped past her stern with the band playing that famous air.

The expected demonstration at the White Star pier by Irish sympathizers, who intended to show their disapproval of the admiral's speeches in London, failed to materialize, partly because of the presence of 1,000 policemen and partly because of the speed with which Sims was hurried to a hotel in an automobile.

Sims was the first passenger
